About us

Millmax LTD provides comprehensive services for contract manufacturing of dietary supplements and cosmetics on a turnkey basis.

Work starts with the idea of a product to its development. Millmax cooperates with suppliers of raw materials, develops branding, draws up documents, and organises mass production. The result of the process is the final product that the client receives.

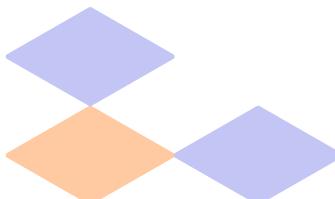

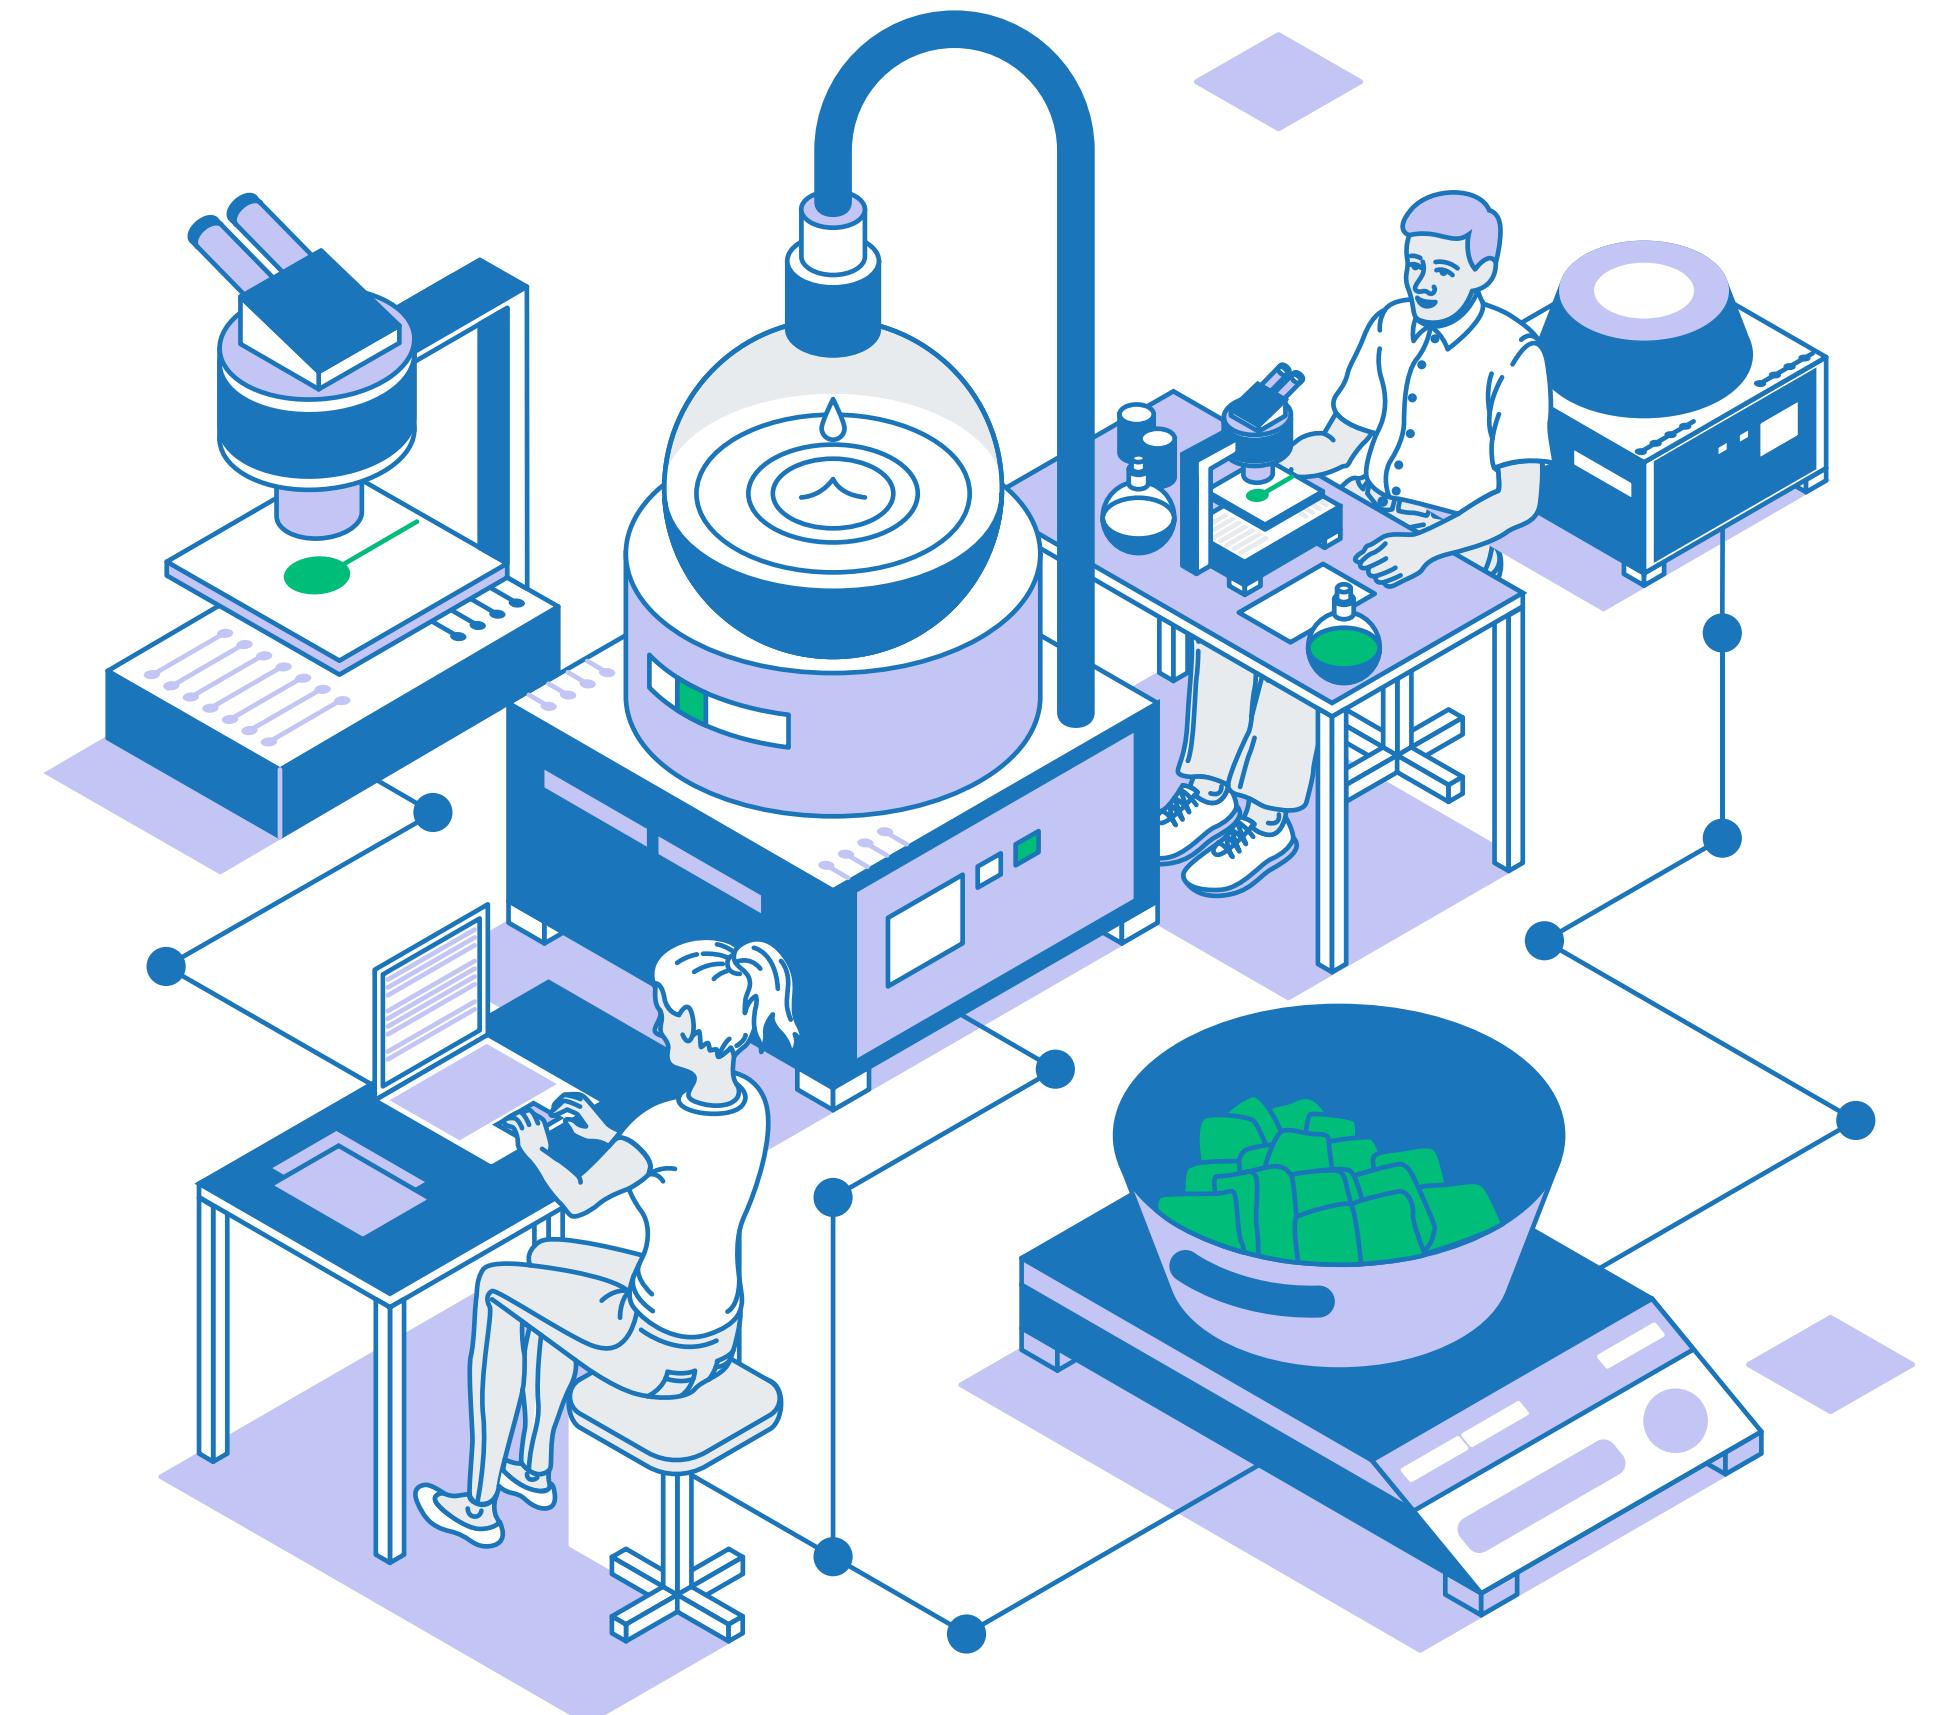

Our advantages:

- Our capabilities allow us to produce the following types of products: creams, gels, powders, liquids and capsules. We can also flexibly change the formula of the product.
- We have all the necessary equipment for the production and packaging of both large and small batches.
- Products are manufactured and certified in accordance with EU standards.
- The manufactured products fully comply with the legislation of the countries where they will be sold.
- Production is carried out only by certified employees with relevant experience in leading enterprises.
- We can create a formula from scratch upon your request, and also offer a choice of ready-made formulas with the possibility of their modification.
- We offer a selection of more than 40 packaging options of different colours and volumes.

2 Laboratory and R&D

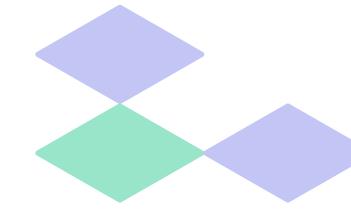

Millmax has a private laboratory that opens up opportunities for completing important tasks:

- **Development of a new formula at the customer's request.** We can make a formulation from scratch and produce samples, which you can change if desired.
- **Production and modification of ready-made formulas.** You can change the aroma, taste, concentration, and packaging.
- **Working with high-quality raw materials and consulting.** We always pre-test the goods we manufacture. We also provide consultations and advice on the sale of products in EU countries.
- **Quality control of ingredients in third-party laboratories.** Additionally, we use high-quality laboratory equipment when testing at MillMax.
